vishnupatel9926@gmail.com | +91-8962177906 | GitHub | LinkedIn | Portfolio

Skills

- **Languages:** Java , C++, C, Python, JavaScript, HTML, Cascading Style Sheets (CSS)
- **Technologies:** React JS, Next JS, Tailwind CSS, Node JS, Express JS, Postman, Linux
- **Databases:** MongoDB, MySQL
- **Tools:** Git, GitHub, Github Actions, Docker
- **Development Methodologies:** Agile Development, SDLC, Scrum, CICD pipelines

Projects

AI-Powered Video Management Web App

Next.js, NextAuth.js, MongoDB Atlas, Docker, GitHub Actions, ImageKit API

- Built a full-stack video management platform using Next.js with NextAuth.js authentication and MongoDB Atlas for scalable cloud-hosted database management.
- Integrated ImageKit API for optimized video uploads up to 200MB with CDN delivery, real-time upload tracking, and AI-powered media transformations.
- Implemented protected routes and role-based access control using NextAuth.js for secure session management and user authorization.
- Containerized the Next.js application using Docker with a multi-stage production build setup for lightweight and efficient deployment.
- Configured GitHub Actions CI/CD pipeline to automate application build, linting, Docker image creation, and deployment workflows.
- Managed sensitive credentials and environment variables securely using GitHub Secrets and cloud deployment configurations.

PDF Viewer & Data Extraction Dashboard

Next.js, Node.js, MongoDB Atlas, Gemini API/Groq, pdf.js

- Developed a PDF review dashboard allowing in-browser upload Size of upto 25MB and viewing with zoom and page navigation.
- Integrated AI extraction (Gemini API/Groq) to parse invoices—vendor info, invoice metadata, and line items—into editable forms.
- Implemented full CRUD operations on MongoDB with search and list functionality for efficient invoice management.
- Built a split-layout UI with shadcn/ui: left panel for PDF viewer, right panel for editable extracted data.
- Created RESTful API endpoints for PDF upload, AI extraction, and invoice management; frontend deployed on Vercel, backend on Render.

Charity Donation Web App

Next.js, Node.js, Ethereum, Solidity, Web3, Express, Metamask

- Blockchain based solution to cut the involvement of a 3rd party in charitable donations and to achieve full transparency with donors.
- Used Ganache for running local blockchain, handled 50+ mock transactions with 100% accuracy using metamask.
- The donors can view the organization expenditures for transparency.
- Provided a solution approach for organization managers to create transactions request which gets approval and later once transactions completed are visible to the donors.
- Provided further visibility to donors to let them know the amount of donors, balance of a organization and all the till date transactions.

Education

Vellore Institute of Technology	2022 – 2026
B.Tech in CSE	CGPA: 8.12
SKPS School, Indore (M.P)	2019 – 2021
Class XII (CBSE) - PCM	Aggregate: 79%
Vidyasagar School, Indore (M.P)	2007 – 2019
Class X (CBSE)	Aggregate: 89%

Certifications And Coursework

- Microsoft Azure AI Fundamentals (AI-900)
- Data Structures and Algorithms, Operating System, OOP, Web Development, Software Engineering, CAO, TOC, CN, DBMS, Cryptography and Network Security

Achievements

- Represented school in TCS IT Wiz (nationwide quiz).
- Top 20 G20 Quiz candidate from VIT.

Positions of Responsibility

Mozilla Firefox Club	Jun 2023 – May 2025
Senior Core Member	
• Organized programming competition with 100+ students.	
• Facilitated various events such as workshops and hackathons.	
Bulls and Bears Club	Mar 2023 – Aug 2023
Core Member	
• Review panelist for Hackstory (45+ teams).	
• Conducted “Cashflow” event in Gravitas’23.
